Officer

Aug 2023 – July 2024

CougarCS, University of Houston

Houston, TX

- Led the planning and execution of coding competitions, hackathons, and technical workshops, enhancing members' skills in programming and problem-solving
- Coordinated guest speaker events and networking sessions, connecting members with industry professionals and fostering career opportunities
- Collaborated with other officers to develop strategies for increasing club membership, resulting in a 15% growth over the semester

PROJECTS

CasualConf | Video Conferencing App

[GitHub Repository](#)

- Developed a video conferencing application that allows users to create, schedule, join, & record virtual meetings, enabling seamless remote communication & collaboration for users across various platforms
- Integrated Clerk for secure account creation & GetStream API for real-time meeting functionality, enhancing real-time interactions during virtual meetings

SynthSpeak | AI ChatBot

[GitHub Repository](#)

- Constructed an interactive chatbot clone that makes use of the OpenAI API to facilitate context-aware, real-time discussions, providing users with an engaging and intelligent conversational experience
- Leveraged Next.js for server-side rendering and efficient API routes, resulting in faster load times

Netflix | Netflix Replica

[GitHub Repository](#)

- Designed a dynamic Netflix-inspired movie streaming application, offering users a familiar and intuitive interface for premium streaming
- Formulated secure user authentication, browsing of movies & TV shows, & displaying trending content with embedded YouTube trailer
